Docket: 102-302 Re

For: Chemotaxis Assay

Dated: September 23, 1998

Assistant Commissioner for Patents
Washington, DC 20231

REISSUE DECLARATION

Sir:

I, Ruy Tchao, declare that I am a citizen of the United States and a resident of Flourtown, Pennsylvania, and:

that I believe that I am the original and first sole inventor of the subject matter claimed in U.S. Patent No. 5,601,997 (hereinafter the '997 patent), entitled "Chemotaxis Assay Procedure";

that I have reviewed and understand the specification of the accompanying reissue application, including the claims;

that I believe that I am the original and first sole inventor of the subject matter which is claimed and for which a reissue patent is sought; and

that I acknowledge my duty to disclose to the U.S. Patent Office all information known to me to be material to patentability as defined in 37 C.F.R. §1.56.

I further declare that I believe the above-identified original patent to be partly inoperative or invalid by reason of my claiming less than I had a right to claim in the original patent.

09472490-122399

Specifically, I believe that the original patent is partly inoperative or invalid for including limitations in the claims which were not required by the prior art.

During the course of negotiations to license certain of my rights in the '997 patent to Becton Dickinson and Company (hereinafter "Becton") certain limitations in the claims thereof came to my attention. In particular, after reviewing the specification and issued claims of U.S. Patent No. 5,601,997 and consulting with patent attorneys at Becton and the law firm of Hoffmann & Baron, LLP, who are outside patent counsel for Becton, I came to the realization that I had inadvertently failed to claim certain broad aspects of my invention.

I believe that the error constituted inadvertent failure to appreciate the full scope of claims which were available in view of the prior art, and that the error arose without any deceptive intention on my part.

Claim 16 of the reissue application corresponds generally with claim 1 of the '997 patent. Claim 16, however, differs from claim 1 in at least one respect including, for example:

The limitation "relating to the use of a radiation opaque membrane" included in claim 1 does not appear in claim 16. Claim 16 additionally recites the use of a "permeable, detection blocking membrane". No art was cited against this claim 1 by the Examiner.

These and other limitations in claim 1 resulted from the apparent failure of myself and prior patent counsel to fully appreciate the limiting nature of the claim limitations, as well as failure to fully appreciate the full scope of the invention as taught by the specification.

In the course of attempting to license my patent to Becton, I was advised by Becton's outside counsel of the narrow scope of coverage to which the '997 patent may be entitled as a result of such limitations. During prosecution of the application, I did not fully realize or

appreciate the effect of these limitations on the scope of coverage provided by the resulting patent.

I have always felt that a significant aspect of my invention is its applicability to any assay which lends itself to the use of a permeable, detection blocking membrane for detecting and/or identifying and/or quantifying biological material present on one side of the membrane but without detecting/identifying/quantifying biological material that has not crossed the membrane. Furthermore, I have always believed that another significant aspect of my invention was to provide an assay that was substantially non-destructive of the biological material that was being detected/identified/quantified notwithstanding the nature of the assay. Through inadvertent error, none of the claims of the '997 patent either as originally submitted or as allowed, claim these specific aspects of my invention.

Furthermore, all errors being corrected in the present reissue application arose without any deceptive intention on my part.

I declare that all statements made herein of my own knowledge are true, and that all statements made upon information and belief are believed to be true, and further that these statements were made after being warned that wilful false statements and the like are punishable by fine or imprisonment, or both, under 18 U.S.C. §1001, and that such false statements may jeopardize the validity of this application or any patent issuing thereon.
